Class 4	Additional Electives (optional)	Additional Electives (optional)	Additional Electives (optional)	Additional Electives (optional)

- Classes fill up quickly and there are **no spaces designated to GH Minor students**, enroll early.
- *You are encouraged to complete the minor over the course of two-years to not overwhelm your schedule however it is possible to do in 1 year if you have the space.
- GH 101 is offered every quarter; all of the other courses are offered **once** a year therefore please plan accordingly.
- You may select GH 410 **or** GH 210. You are not required to take both.
- “Additional Electives” means you may choose to complete a component of the elective areas (i.e.: The Environment & Global Health, Comparative Health Systems & Approaches to Health, Sociocultural Ecology of Health or Regional & Area Studies).
- There are no required courses in the summer. Elective courses in the summer are very limited and vary in selections.
