

GLOBAL HEALTH MINOR

The Global Health Minor gives undergraduate students an opportunity to become familiar with major disparities, determinants, policies, and outcomes in global health. Students participating in the minor develop a critical framework for understanding and evaluating global health phenomena along with existing and proposed solutions to major challenges. By becoming knowledgeable in these core areas, students will also be able to engage actively in efforts to improve health as global citizens. At the University of Washington, diversity is integral to excellence.

We value and honor diverse experiences and perspectives, strive to create welcoming and respectful learning environments, and promote access, opportunity and justice for all.

MINOR REQUIREMENTS 30 CREDITS

REQUIRED COURSES (11 CREDITS)
