Achieving sustainable improvements in health with partners around the world.

Our mission is to improve health for all through research, education, training, and service; to understand and address the causes of disease and health inequities at multiple levels; and to collaborate with partners to develop and sustain locally led, quality health systems, programs and policies.

What We Do:

- A world leader in the research methods: We test new technologies and approaches to health challenges and do implementation science to close the “know-do gap.”
- Ground-breaking discoveries: Our faculty and students focus on innovating, evaluating, and building capacity to address the most pressing health problems that the world faces.
- Premier education and training programs: We prepare the next generation of leaders in research, evidence-based practice, and policy development.
- Extraordinary geographic reach: Our faculty and students work with colleagues in more than 130 countries.

Our Expertise Includes:

- Global cardiovascular health
- Global environmental change impacts on health
- Global injury and violence prevention
- Global mental health
- Health of women, adolescents and children
- HIV/AIDS, STIs, and other infectious diseases
- Implementation science
- Pandemic disease preparedness and global health security

Our research focuses on vulnerable people and communities most at risk for adverse health outcomes, including children, women, and people in low- and middle-income countries and communities around the world.
UNIVERSITY of WASHINGTON
DEPARTMENT OF GLOBAL HEALTH

59 Degrees Granted (2017–2018)
- 53 MPH
- 3 PhD Global Health: Metrics and Implementation Science
